

HOME LEARNING

Reception

WEEK 6

THEME: IN THE GARDEN

Date: 12.05.2020

MATHS

Today, I would like you to think about the months and seasons of the year. Firstly, can you recite the months of the year (like we used to do every morning during carpet time)? If you are finding this difficult, there are songs on Youtube to help, here is the link to one of them [Months of the Year](#).

After you have remembered all the months of the year I would like you to think about the 4 seasons, we have Spring, Summer, Autumn, Winter. Here is a simple video explaining what happens in each of the seasons [Seasons of the Year](#). After you have watched the video clip I would like you to look at the pictures below and decide which season they are all from. Discuss your reasons with an adult.

LITERACY, COMMUNICATION AND LANGUAGE

Reading: Just a reminder to make sure you are reading regularly with an adult, if you register and log into Oxford Owl there are ebooks that you can use on there. Here's the link: [Oxford Owl EBooks](#)

I would like you to have another listen to the story of Superworm, either ask an adult to read it to you if you have the story at home or watch the Cbeebies bedtime version here: [Superworm Cbeebies](#).

After reading the story can you try and remember some of the insects and animals that you saw in the story. You may need to keep the book or online story open and keep referring back to it to refresh your memory. Once you have tried to remember the animals and insects from the story I would like you to write a list of them, remember a list is where the words go underneath one another. Use your phonics to sound out each word as best you can.

PHYSICAL ACTIVITY- Choose one

[Joe Wicks Work Out](#)

9am The Body Coach on You Tube or use an uploaded video

Try something a little different today, here is a cosmic kids yoga I think some of you will really enjoy: [Minecraft Cosmic Kids](#)

THEMED LEARNING

Today, I would like you to think about a skill we had been working on in class which was 'To construct with a purpose in mind'. This means that we need to think about and decide what model we want to create before we start to build. We then need to consider what materials would be best for creating this model. I would like you to use whatever you have in the house to do some building today, if you have some lego, duplo, stickly bricks or any other constructing material then that's great, if not then you could use some boxes and tubes from your recycling or some baskets, plastic tubs or containers that you have in the house. I then want you to decide what you are going to create, it could be a house, a car, a train or animal. Use your imagination! Then begin to construct your model thinking carefully about what it looks like in real life. Experiment with different ways to join your materials and after creating your model talk to an adult about how and why you chose to build your model in that way. Happy building everyone!

INDEPENDENCE SKILL

This week I would like you to help an adult to prepare your lunch at least once. You could help to make a sandwich by carefully buttering the bread and putting on your filling or by getting yourself a drink. Make sure to check with a grown up before completing this task.
