MATHS

Warm up for today: See if you can answer these 1 more and 1 less questions. Don't forget to use a number line if you need to.

[number line to 20](#)

What is 1 less than 9?

What is 1 more than 1?

What is 1 less than 3?

What is 1 more than 16?

What is 1 more than 12?

What is 1 less than 2?

Is this right or wrong? 7 is 1 less than 6. How do you know the answer?

Is this right or wrong? 17 is 1 more than 18. How do you know the answer?

Parents, the last 2 questions are reasoning ones. The children have to give a reason for why they think the answer. The answers can be as simple as because 7 is 1 more than 6 or 7 comes after 6. If your child struggles with these. Don't worry, model the answer for them. They need to get used to hearing these kind of questions and be given the opportunity to verbalise their thinking.

Yesterday, you watched Rosie's walk. Today I have a clip that will give you the opportunity to read the book yourself. Parents if you could turn off the volume so the children read the book themselves.

[Rosie's walk](#)

Well done, there were some tricky words in there.

Now I thought you could make your own puppet show of Rosie's walk. The puppets and scenery can be found in the link below. You don't have to copy the story but make your own up so Rosie could go over the fence or around the beehives.

Parents, just use the single Rosie and Fox cut outs and the objects without Rosie or the Fox, so the children can create their own story.

[Rosie's walk cut outs](#) Don't forget the words you can use **over, under, in between, behind, in front of, around, across, past and through,**

If you have created a really good story, get an adult to film it so you can share it with family and friends.

LITERACY

Let's warm up by recognising our sounds. Parents choose the one best for your child. If they are confident with Sound set 1 and Sound set 2, have a go at the sounds below.

[Sound set 1](#)

[Sound set 2](#)

Ok, now you've warmed up, let's do some reading.

Parents, if your child is practising their blending, have a go at one of the Ditties. [Ditties](#)

If your child is a confident blender, I would like them to look at these pictures. Then using the sounds chart used in the warm up, get them to identify the correct initial digraph.

For your final Literacy task, I would like you to look at the lovely painting you did yesterday of something you are good at. Today, I would like you to have a go at writing a sentence about your painting. It could start with **I can**. Now think of 3 other things you can do. Draw a picture and write a sentence for each one.

PHYSICAL ACTIVITY

Have a look at these songs. They are really happy cheerful ones. Dance your little hearts out to these for your physical activity.

[Justin Timberlake 'Can't Stop the Feeling'](#)

[Pharrell Williams 'Happy'](#)

THEMED LEARNING

Today I have a story for you that involves all the animals in the world and a rainbow. It comes from a special book called the Bible. The Bible is read by Christians. Christians are people who go to a church to pray to their God and celebrate special times like Christmas, Easter and Weddings.

[Noah's Ark Story](#)

Parents, I've linked the story of Noah's Ark to what is happening now. If you would prefer not to use this as a link to today's situation that is not a problem. Just go straight to the rainbow and construction activity.

Noah and the animals had to spend a long time in the ark and couldn't see their friends for a very long time. A bit like we have been doing. In the end, Noah and the animals could come out and play with everyone and one day that will happen for us too. We've seen lots of rainbows in people's windows. Rainbows are a sign of hope that we will all be able to come out and play with no social distancing one day.

Ok, children. I would like you to create a rainbow now with finger prints or cotton balls. You could turn it into a Father's Day card or a card for someone else. Draw you and your family or special someone underneath. Then write a message inside. Keep it safe or put it in an envelope and send it as a special surprise.

Now, see if you can create an enormous ark for some your toy animals or use the cut out animals from the link below.

[animal cut outs](#)

INDEPENDENCE SKILL

This week I would like you to begin to learn how to tie your own shoelaces. Shoelaces can be tricky and there are different methods you can use to tie them.
